CorePlexML

The Complete ML Platform.
From Data to Production.

AutoML, MLOps, Privacy Suite, Synthetic Data, ML Studio & AI Dataset Builder — one integrated platform that replaces 5 different tools.

— PLATFORM MODULES

AutoML
Multi-engine AutoML with H2O + FLAML. Automatic algorithm selection, tuning, and parallel engine orchestration.

MLOps
Full lifecycle: model registry, canary/blue-green deployments, A/B testing, drift detection, alerts, and auto-retraining.

Privacy Suite
72+ PII types detected. HIPAA, GDPR, PCI-DSS, CCPA compliance. Mask, redact, encrypt with full audit trails.

SynthGen
Generate privacy-preserving synthetic data with CTGAN, CopulaGAN, TVAE. Statistical quality & privacy scoring.

ML Studio
What-If analysis workspace. SHAP values, PDP, scenario comparison, and fairness metrics for every model.

Dataset Builder
AI-powered data prep via natural language. Upload CSV/Excel, clean, transform, and engineer features — no code.

— WORKFLOW

Three steps to production ML

1 Upload Data
CSV, Excel, JSON, XML — drag & drop. AI assistant handles cleaning, type inference, and feature engineering.

2 Train Models
AutoML selects algorithms, tunes hyperparameters, and builds ensembles automatically. Full explainability included.

3 Deploy & Monitor
One-click deployment with canary rollouts, drift detection, auto-retraining, and real-time inference API.

Free

$0 /mo

Explore the platform.

- ✓ 1 project, 5 models
- ✓ 10 jobs / day
- ✓ AutoML (all algorithms)
- ✓ 1 deployment
- ✓ ML Studio
- ✓ Dataset Builder (1/day)

Pro

$49 /mo

Full platform access.

- ✓ Unlimited everything
- ✓ Privacy Suite (72+ PII)
- ✓ SynthGen
- ✓ Canary & A/B testing
- ✓ Auto-retraining
- ✓ Priority support

Team

`5 seats`

$199 /mo

Shared team workspace.

- ✓ Everything in Pro
- ✓ 5 seats (up to 10)
- ✓ RBAC & team dashboard
- ✓ Centralized billing
